

# HANDZFREE!

*Smart Sanitation  
Solution...!*

The New Normal is here, and regular use of hand sanitizer and wearing gloves while you're out is must and is a great idea to limit your potential exposure to the contamination. **Still better is using a tool that means, no part of you is in contact with contaminated surfaces.**

**HandZfree** is made from Antimicrobial Polymer Plastic that resists microbe's colonization and enables you to access such surfaces without having the need to touch it. These unprotected common surfaces are the probable source of infections and illness, HandZfree eliminates the need to touch these surfaces in day to day activities.

**The Polymer base (Additive) used in the making of HandZfree tool are :**

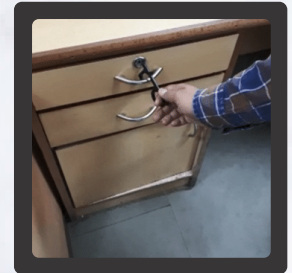

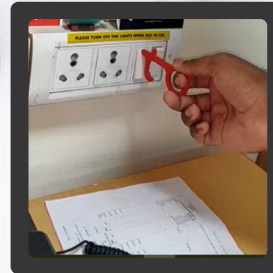

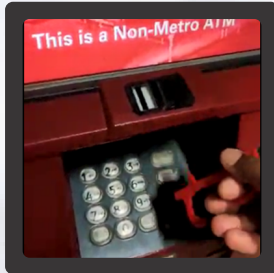

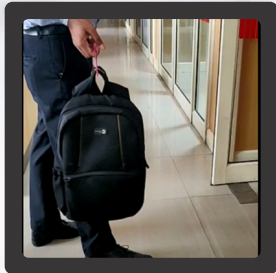

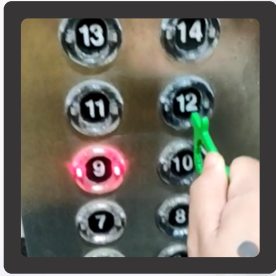

- **Silver Ion inorganics proprietary** base,used for imparting anti-virus properties on polymer surface.
- It offers a **unique, eco-friendly, non-hazardous, anti-microbial coating** for surfaces to prevent virus contamination.
- Offers **Log 6 reduction for bacteria** and **Log 3 reduction for virus**.
- **ROHS** compliant, **FDA** compliant, **EU norms** compliant & in accordance of **IS 9833 standards**.

### COLOR OPTIONS

---

# APPLICATIONS

Contact less safety tool
