

Nissan® 20 Digit Pincode Bypass Software ADS198SD for Smart Dongle - Code D745387AD

Requires Nissan® ADS197 Software for Key Programming

September 2015

Advanced Diagnostics are pleased to announce the release of a FREE software update for Nissan® PINCODE Read software ADS198SD, specifically developed for use on the Smart Dongle.

What does the free software update do?

The software update has been developed to remove the requirement to enter the 20 digit code during the key programming process on various Nissan® & Infiniti® vehicles found worldwide, making the key programming process complete and streamlined.

What software & products will I need to program keys for Nissan®/Infiniti® vehicles?

- Nissan®/Infiniti® 2013 - ADS197 Software
- Nissan® PINCODE Read Software - ADS198SD
- Smart Dongle
- Programming Devices

Nissan®/Infiniti® ADS197 key programming software was previously available in North America only - and now has been extended worldwide.

The software has also been extended with the addition of a new vehicle to the menu - the 2015 Nissan® Qashqai, which is also a free update.

The Nissan® 20 digit pincode bypass software will be available on ADS198SD, which works with the Smart Dongle. Customers that have ADC198 can get ADS198SD free of charge if they have purchased a Smart Dongle. For the vehicle application list, please see below and on IQ.

Contact Your Silca Distributor to buy a Smart Dongle & ADS198SD Software.
