

New Key Programming Software Chrysler® 2019 for Smart Pro only ADS2291 - Code D753941AD

October 2019

Advanced Diagnostics is pleased to announce the release of the ADS2291 key programming software for Chrysler®.

What does the software do?

The ADS2291 software programs proximity keys for certain Dodge® and Maserati® models.

All keys and remotes will be erased before programming new ones. The software bypasses the security pincode during the procedure and programs the remote and the transponder at the same time.

No working key or additional software are required, but the use of an additional cable is necessary to complete the programming procedure. The use of the ADC2011 cable is required to program the Dodge® Ram and Maserati® Ghibli; while the ADC2012 cable is required to program the Maserati® Levante.

Note: This software is available for Smart Pro only.

OFFER DETAILS

Cable	ADC2000
Smart Aerial required	No
