

Key Programming Software Update Nissan® 2020 ADS2297 - Code D754587AD

February 2021

Advanced Diagnostics is pleased to announce an update to the ADS2297 key programming software for Nissan® to include bladed keys for the Micra and Kicks models.

What does the software do?

The ADS2297 software programs both proximity and bladed keys for various Nissan® vehicles without the need for online access or dealer codes.

The security is automatically bypassed making for a quick and easy, stand-alone procedure. As with earlier Nissan® procedures all keys and remotes will be erased during the programming sequence. Remote and proximity functions are programmed simultaneously.

The software supports all keys lost situations (no working keys required).

What else will I need?

Smart Pro

OFFER DETAILS

Cable	ADC2000
Smart Aerial / other accessories required	No
Software category	C
