

Key Programming Software Update compatible with Fiat* ADS2295 - Code D754548AD

April 2021

Advanced Diagnostics is pleased to announce the release of an update to the ADS2295 software to program bladed and proximity keys for the Fiat* Fullback. It is the **FIRST** aftermarket solution worldwide to cover these models via OBD connection, without using a bypass cable.

What does the software do?

The ADS2295 software programs bladed and proximity keys for a wide range of Fiat*, Alfa Romeo* and Jeep* models worldwide, including the Fiat* Fullback from 2016 to 2019.

The software supports all keys lost situations and bypasses the security pincode during the procedure. All keys and remotes will be erased before programming new ones, whilst the remote and the transponder are programmed at the same time.

The update does not require additional software or cable.

What else will I need?

Smart Pro

OFFER DETAILS

Cable	ADC2000
Software category	A
Other accessories required	No
